

Reverse Unification Index

The Reverse Unification Index is your key for sourcing from the source Gospels of Matthew, Mark, Luke and John back into ONE.

The (standard) Unification Index references ONE back to the source Gospels, and the Reverse Unification Index references from the source Gospels into ONE. Using the each index permits the reader to authoritatively research the text as unified.

The Reverse Unification Index is separated into each of the four Gospels, with a two-column reference table for each Gospel. The chapter:verse reference for each of the Gospels is in the first column, and the ONE reference number is in the second column. When the chapter changes, the first verse is bolded for ease of reference.

In the example below, the Gospel of John, Chapter 1, Verse 1 (as indicated in the first column) is referenced to ONE:1 (as indicated in the second column).
